Authorizing SentiConnect®

Created March 2023

SentiConnect® is a smartphone app that provides a non-SentriLock user a way to receive access to open the key compartment of a Bluetooth lockbox. The Listing Agent/lockbox owner will grant access to the user to enter their lockbox(es). SentiConnect™ accesses to a lockbox's key compartment will be displayed within the Listing Agent/lockbox owner's lockbox access log, allowing more secure tracking of their lockbox activity. This feature is like Contractor Mode.

Use the following steps if you are a Listing Agent/lockbox owner that needs to authorize an existing SentiConnect® user on an Apple device:

1. Log into the SentiKey smartphone application.
2. Select the three lines at the top of the app for more.
3. Select **My Lockboxes**.
4. Select **Grant SentiConnect® Access**.
5. Search for the lockbox number or assigned address.
6. Enter the following information for the SentiConnect® user:
 - A. Email Address
 - B. Start Time
 - C. End Time
7. Select **Grant Access**.
8. Enter your **PIN** and select **Grant Access**.
9. You will receive a confirmation message, select **OK**.

Use the following steps if you are a Listing Agent/lockbox owner that needs to authorize a new user on an Apple device:

1. Follow steps 1-6 from above.
2. Select **Grant Access** and enter your **PIN**.
3. Since this is a new user, you will be prompted if you would like to invite the new user to use SentiConnect®.
4. Select **Send Invite**.
5. After receiving confirmation that you have successfully invited the new user, select **OK**.
